A New York Times Notable Book for 2011 One of The Economist's 2011 Books of the Year People speak different languages, and always have. The Ancient Greeks took no notice of anything unless it was said in Greek; the Romans made everyone speak Latin; and in India, people learned their neighbors' languages—as did many ordinary Europeans in times past (Christopher Columbus knew Italian, Portuguese, and Castilian Spanish as well as the classical languages). But today, we all use translation to cope with the diversity of languages. Without translation there would be no world news, not much of a reading list in any subject at college, no repair manuals for cars or planes; we wouldn't even be able to put together flat-pack furniture. Is That a Fish in Your Ear? ranges across the whole of human experience, from foreign films to philosophy, to show why translation is at the heart of what we do and who we are. Among many other things, David Bellos asks: What's the difference between translating unprepared natural speech and translating Madame Bovary?
How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages, or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators, and if not, why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says—in our own language or in another? Surprising, witty, and written with great joie de vivre, this book is all about how we comprehend other people and shows us how, ultimately, translation is another name for the human condition.

The northern lights shine, women gather to eat raw caribou meat and everyone could be family in this ode to small-town life in Nunavut, written in English and Inuktitut. Sisters Angnakuluk Friesen and Ippiksaut Friesen collaborate on this story about what it’s like to grow up in an Inuit community in Nunavut. Every line about the hometown in this book will have readers thinking about what makes their own hometowns unique. With strong social studies curriculum connections, Kisimi Taimaippaktut Angirrarjarani / Only in My Hometown introduces young readers to life in the Canadian North, as well as the Inuit language and culture. Angnakuluk’s simple text, translated into Inuktitut and written out in syllabics and transliterated roman characters, is complemented by Ippiksaut’s warm paintings of their shared hometown. This feast of Middle Eastern folklore from an award-winning Iraqi storyteller is paired with vibrant cut-paper art. The twenty fables and folktales in this illustrated storybook have taken a long journey. Many have roots that stretch across Europe, Asia, and Africa, but when award-winning writer and gatherer of tales Rodaan Al Galidi learned them in his homeland of Iraq, it was as Arabic folktales and as part of the Arabic storytelling tradition. When he migrated to the Netherlands, he shaped twenty of those tales into his debut book for children, which was translated to English by Laura Watkinson. Filled with wisdom about love and acceptance, and warnings against folly, these elegantly translated stories—many unknown in the United States—of donkeys
and roosters, kings, sheikhs, and paupers are exquisitely illustrated by cut-paper artist Geertje Aalders. Beautifully packaged, The Three Princes of Serendip is a rich and varied introduction to the world of Middle Eastern folklore.

This edited volume examines the Seal of Biliteracy (SoBL), a relatively new policy initiative that has received little attention in scholarly and practical literature. The contributions seek to expand the literature by presenting case studies of policy implementation in diverse contexts across the United States. This book is organized into four sections: (1) introduction to the SoBL, including history of the policy initiative and national trends in policy design and implementation, (2) case studies of macro-level policy implementation, including a diverse array of contexts across the country that have approached the SoBL in unique ways (e.g., legislation v. educational code, prioritizing world v. home languages), (3) case studies of micro-level implementation, including schools and districts that award the SoBL to diverse student populations through various language programs (e.g., English-dominant v. linguistically diverse; world language v. dual-language programs), and (4) conclusions and future directions, including actionable next steps for policy makers, administrators, educators, and researchers. Members of various professional organizations will benefit from this text, including the National Association for Bilingual Education (NABE), Teachers of English to Speakers of Other Languages (TESOL), the American Council for Teaching of Foreign Languages (ACTFL), as well as participants in local affiliates for bilingual, English as a second language (ESL), and world language education.

This book of essays offers perspectives for college teachers facing the perplexities of today's focus on cultural issues in literature programs. The book presents ideas from 19 scholars and teachers relating to theories of culture-oriented criticism and teaching, contexts for these activities, and specific, culture-focused texts significant for college courses. The articles and their authors are as follows: (1) "Cultural Criticism: Past and Present" (Mary Poovey); (2) "Genre as a Social Institution" (James F. Slevin); (3) "Teaching Multicultural Literature" (Reed Way Dasenbrock); (4) "Translation as a Method for Cross-Cultural Teaching" (Anuradha Dingwaney and Carol Maier); (5) "Teaching in the Television Culture" (Judith Scot-Smith Girus and Cecelia Tichi); (6) "Multicultural Teaching: It's an Inside Job" (Mary C. Savage); (7) "Chicana Feminism: In the Tracks of 'the' Native Woman" (Norma Alarcon); (8) "Current African American Literary Theory: Review and
Projections" (Reginald Martin); (9) "Talking across Cultures" (Robert S. Burton); (10) "Walter Mitty in China: Teaching American Fiction in an Alien Culture" (H. W. Matalene); (11) "Text, Context, and Teaching Literature by African American Women" (Sandra Jamieson); (12) "Sethe's 'Big, Bad' Love" (Chauncey A. Ridley); (13) "Baldwin, Bebop, and 'Sonny's Blues'" (Pancho Savery); (14) "Filliative and Affiliative Textualization in Chinese American Literature" (David Leiwei Li); (15) "The Unheard: Vietnamese Voices in the Literature Curriculum" (Renny Christopher); (16) "Narrative Theory in Naguib Mahfouz's 'The Children of Gebelawi'" (Suzanne Evertsen Lundquist); and (17) "The Mixed Blood Writer as Interpreter and Mythmaker" (Patricia Riley). Little Sea Otter snuggles with Mama in her sea kelp blanket, but she can't go to sleep before she says good night to all of her friends. The sweet story and gorgeous illustrations will make this book a favorite.

Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs who account for more than 9 percent of enrollment in grades K-12 in U.S. schools are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

This handbook for administrative assistants and secretaries covers such topics as telephone usage, keeping accurate records, making travel arrangements, e-mail, using the Internet, business documents, and language usage.

Utilizing a historical and international approach, this valuable two-volume resource makes even the more complex linguistic issues understandable for the non-specialized reader. Containing over 500 alphabetically arranged entries and an expansive glossary by a team of international scholars, the Encyclopedia of Linguistics explores the varied perspectives, figures, and methodologies that make up the field.

In this jewel-like version of a classic story, popular folklorist Shirley Climo tells the tale of Settareh, the Persian Cinderella. Magic enables Settareh to outsmart two jealous stepsisters and win the heart of a prince. But where most Cinderella stories end, poor Sattareh's troubles are only beginning! The unexpected plot twists will enchant readers as they rediscover the familiar tale in the lush setting of long-ago Persia. Shirley Climo's authentic details bring the story to life, and Robert Florczak's stunning paintings echo the vibrant colors and motifs of an ancient land. 01-02 TX Bluebonnet Award Masterlist

Piggies rock! So does Boynton. Through her eyes, her words, her music, and above all her art, we see the world with whimsy and pleasure, appreciating round noses and curly tails, floppy ears and pleasing plumpness. And we’re lucky to give that gift to our youngest children. A member of the amazing Boynton on Board series that has over 21 million copies in print, Perfect Piggies! also comes with a free downloadable song. Reminiscent of a cappella swing, it’s a celebration of the homey—of beauty in the eye of the beholder, of sunshine and fresh air, and a place to put up our hooves when the day is done. And, of course, the catching energy and rhythmic language of a beloved original: We are all perfect piggies and we know what we need. It’s really very simple, very simple indeed: a troughful of food, a place in the sun, and a little bit of comfort when the day is done. That goes for the rest of us, too.

This book systematically examines how learning to read occurs in diverse languages, and in so doing, explores how literacy is learned in a second language by learners who have achieved at least basic reading skills in their first language. As a consequence of rapid globalization, such learners are a large and growing segment of
the school population worldwide, and an increasing number of schools are challenged by learners from a wide variety of languages, and with distinct prior literacy experiences. To succeed academically these learners must develop second-language literacy skills, yet little is known about the ways in which they learn to read in their first languages, and even less about how the specific nature and level of their first-language literacy affects second-language reading development. This volume provides detailed descriptions of five typologically diverse languages and their writing systems, and offers comparisons of learning-to-read experiences in these languages. Specifically, it addresses the requisite competencies in learning to read in each of the languages, how language and writing system properties affect the way children learn to read, and the extent and ways in which literacy learning experience in one language can play a role in subsequent reading development in another. Both common and distinct aspects of literacy learning experiences across languages are identified, thus establishing a basis for determining which skills are available for transfer in second-language reading development. Learning to Read Across Languages is intended for researchers and advanced students in the areas of second-language learning, psycholinguistics, literacy, bilingualism, and cross-linguistic issues in language processing.

Deals with the period beginning at the close of the Neolithic era, from around the eighth millennium before our era. This period of some 9,000 years of history has been sub-divided into four major geographical zones, following the pattern of African historical research. Chapters 1 to 12 cover the corridor of the Nile, Egypt and Nubia. Chapters 13 to 16 relate to the Ethiopian highlands. Chapters 17 to 20 describe the part of Africa later
called the Magrhib and its Saharan hinterland. Chapters 21 to 29, the rest of Africa as well as some of the islands of the Indian Ocean.--Publisher's description

The method and plan of this dictionary of Jamaican English are basically the same as those of the Oxford English Dictionary, but oral sources have been extensively tapped in addition to detailed coverage of literature published in or about Jamaica since 1655. It contains information about the Caribbean and its dialects, and about Creole languages and general linguistic processes. Entries give the pronunciation, part-of-speech and usage of labels, spelling variants, etymologies and dated citations, as well as definitions. Systematic indexing
indicates the extent to which the lexis is shared with other Caribbean countries.

The Yemissrach Dimts Literacy Campaign in Ethiopia, begun in 1962 and concentrated in rural areas for the benefit of adults, was evaluated in a study of 466 program participants and 66 additional adult villagers. The study focused on student achievement, teaching methods, benefits experienced by participants, and the literacy campaign's role within a larger socioeconomic and political context. Results indicate that students became literate in one to two years of participation. However, individual students said they had not experienced benefits from their literacy skills. Reading in Amharic was taught by synthetic and analytic methods, with the influence of traditional teaching methods obvious. While motivation for sending children to school was strong, adults said it was seldom possible for them to attend themselves. In the case of women and girls, tradition was probably a major obstacle to attendance. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

The fascinating, fun, and friendly way to understand the science behind human language Linguistics is the scientific study of human language. Linguistics students study how languages are constructed, how they function, how they affect society, and how humans learn language. From understanding other languages to teaching computers to communicate, linguistics plays a vital role in society. Linguistics For Dummies tracks to a typical college-level introductory linguistics course and arms you with the confidence, knowledge, and know-how to score your highest. Understand the science behind human language Grasp how language is constructed Score your highest in college-level linguistics If you're enrolled in an introductory linguistics course or simply have a love of human language, Linguistics For Dummies is your one-stop resource for unlocking the science of the spoken word.

An older brother reacts to his younger sibling's gender transformation with compassion. Includes a note from the author.

What do all human languages have in common and in what ways are they different? How can language be used to trace different peoples and their past? Are certain languages similar because of common descent or language contact? Assuming no prior knowledge of linguistics, this textbook introduces readers to the rich
diversity of human languages, familiarizing students with the variety and typology of languages around the 
world. Linguistic terms and concepts are explained, in the text and in the glossary, and illustrated with simple, 
accessible examples. Eighteen language maps and numerous language family charts enable students to place a 
language geographically or genealogically. A supporting website includes additional language maps and sound 
recordings that can be used to illustrate the peculiarities of the sound systems of various languages. 'Test 
yourself' questions throughout the book make it easier for students to analyze data from unfamiliar languages.

The Autobiography of Malcolm X was intended to be a true autobiography, with the name of Alex Haley 
appearing not at all or as a ghost writer or as a mere contributor or assistant. However, with the assassination 
of Malcolm X having occurred in Harlem in New York City on February 21, 1965 just before this book could be 
published, it became necessary to reveal the important role of Alex Haley in creating this book.

Science, engineering, and technology permeate nearly every facet of modern life and hold the key to solving 
many of humanity's most pressing current and future challenges. The United States' position in the global 
economy is declining, in part because U.S. workers lack fundamental knowledge in these fields. To address the 
critical issues of U.S. competitiveness and to better prepare the workforce, A Framework for K-12 Science 
Education proposes a new approach to K-12 science education that will capture students' interest and provide 
them with the necessary foundational knowledge in the field. A Framework for K-12 Science Education 
outlines a broad set of expectations for students in science and engineering in grades K-12. These 
expectations will inform the development of new standards for K-12 science education and, subsequently, 
revisions to curriculum, instruction, assessment, and professional development for educators. This book 
identifies three dimensions that convey the core ideas and practices around which science and engineering 
education in these grades should be built. These three dimensions are: crosscutting concepts that unify the 
study of science through their common application across science and engineering; scientific and engineering 
practices; and disciplinary core ideas in the physical sciences, life sciences, and earth and space sciences and 
for engineering, technology, and the applications of science. The overarching goal is for all high school 
graduates to have sufficient knowledge of science and engineering to engage in public discussions on science-
related issues, be careful consumers of scientific and technical information, and enter the careers of their choice. A Framework for K-12 Science Education is the first step in a process that can inform state-level decisions and achieve a research-grounded basis for improving science instruction and learning across the country. The book will guide standards developers, teachers, curriculum designers, assessment developers, state and district science administrators, and educators who teach science in informal environments.

It’s a simple, best-selling combination that has worked for thousands of students — short, accessible essays and helpful, thorough writing instruction. Models for Writers continues to offer thought-provoking selections organized to demonstrate not only the rhetorical patterns that students will use in their own essays but also the elements and language that will make those essays effective. This edition offers more coverage of the key elements of academic writing, including new strategies for writing a research paper and a section on writing a reflective essay. Read the preface.

Horace G. Danner’s A Thesaurus of English Word Roots is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: “Dr. Danner’s book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!” In A Thesaurus of English Word Roots, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots’ original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odynacusis.. In this manner, A Thesaurus of English Word Roots places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.
This book constitutes the refereed proceedings of the 9th International Conference on Advances in Natural Language Processing, PolTAL 2014, Warsaw, Poland, in September 2014. The 27 revised full papers and 20 revised short papers presented were carefully reviewed and selected from 83 submissions. The papers are organized in topical sections on morphology, named entity recognition, term extraction; lexical semantics; sentence level syntax, semantics, and machine translation; discourse, coreference resolution, automatic summarization, and question answering; text classification, information extraction and information retrieval; and speech processing, language modelling, and spell- and grammar-checking.

Little Red likes to play by the rules. So when the narrator comes along and asks her to follow the story set out in her fairy tale, she grabs the basket for Grandma and goes. After all, she loves her grandma. But unfortunately, none of the other characters are quite what they're expecting. As Little Red attempts to follow the narrator's directions (which, frankly, seem kind of dangerous!), she is beset by fill-in characters, confusing instructions, and even a fierce battle! Will Little Red ever make it to Grandma's house? And who will she find when she gets there? Complete with some unusual "guest appearances," this laugh-out-loud Little Red Riding Hood retelling will have kids giggling all the way to Grandma's house! Ding-dong!

Dual language education is a program that combines language minority and language majority students for instruction through two languages. This book provides the conceptual background for the program and discusses major implementation issues. Research findings summarize language proficiency and achievement outcomes from 8000 students at 20 schools, along with teacher and parent attitudes.

This book presents an overview of seventeen forms of inquiry used in curriculum research in education. Conventional disciplinary forms of inquiry, such as philosophical, historical, and scientific, are described, as well as more recently acknowledged forms such as ethnographic, aesthetic, narrative, phenomenological, and hermeneutic. Interdisciplinary forms such as theoretical, normative, critical, deliberative, and action research are also included. These forms of inquiry are distinguished from one another in terms of purposes, types of research questions addressed, and the processes and logic of procedure employed in arriving at knowledge claims.

The "world of letters" has always seemed a matter more of metaphor than of global reality. In this book, Pascale Casanova shows us the state of world literature behind the stylistic refinements--a world of letters relatively independent from economic and political realms, and in which language systems, aesthetic orders, and genres struggle for dominance. Rejecting facile talk of globalization, with its suggestion of a happy literary "melting pot," Casanova exposes an emerging regime of inequality in the world of letters, where minor languages and literatures are subject to the invisible but implacable violence of their dominant counterparts. Inspired by the writings of Fernand Braudel and Pierre Bourdieu, this ambitious book develops the first
systematic model for understanding the production, circulation, and valuing of literature worldwide. Casanova proposes a baseline from which we might measure the newness and modernity of the world of letters--the literary equivalent of the meridian at Greenwich. She argues for the importance of literary capital and its role in giving value and legitimacy to nations in their incessant struggle for international power. Within her overarching theory, Casanova locates three main periods in the genesis of world literature--Latin, French, and German--and closely examines three towering figures in the world republic of letters--Kafka, Joyce, and Faulkner. Her work provides a rich and surprising view of the political struggles of our modern world--one framed by sites of publication, circulation, translation, and efforts at literary annexation.
